

In The Legislature

BY G. E. BELL, M.L.A.

This week I will endeavor to give you a little further information in connection with the 1951 budget brought down last week by Premier E. C. Manning.

During the past few years, when the government made a grant to municipal units, the municipal unit had to put up 40 percent of the cost of a project to use the grant money for the other 60 percent. This has been changed now so that the municipal unit only has to put up 25 percent in order to qualify for provincial road construction grants.

The total assistance from the provincial government to the municipal unit for this year is equal to more than 38 mills on the total aggregate assessment. This is the assessment used for 1950.

An additional three million dollars is being set aside under the School Borrowing Act. The grants payable under this act are being increased from 12 1/2 percent to 20 percent on approved borrowings as of April 1st, 1951.

An additional \$7,000,000 is being set aside this year under The Sell Liasating Projects Act. This money is made available to municipalities for long term loans at 2 percent interest. By the end of 1950 nearly \$5,000,000 had been loaned under this Act from last year's allocations.

Legislation is being considered by the House at this session which will enable Alberta citizens to purchase Provincial Annuities on very favorable terms. Payments of money into this annuity fund by anyone will bear interest at 3 1/2 percent compound annually. The money accumulated in this fund will be made available for municipal borrowing at lower interest rates than prevailing today. This scheme will provide an opportunity for people to save for themselves. It will help municipalities and it will keep money invested in Alberta. Fuller details on this will be available to the public soon.

Continuing the budget debate, Hon. Gordon Taylor, Minister of Railways and Telephones outlined the vast expansion of telephone service in the province. During the last year 6 number of all-time records were made. 54,024 long distance calls were completed, at the beginning of the fiscal year 1949-50, applications for telephone numbers 8,237, 8,977 telephones were installed during the year and yet at the end of the period there was still a waiting list of 10,150.

Since the beginning of the fiscal year, i.e. April 1950, another 7,200 telephones have been installed but new applications continue to pour in and in spite of these gains there is still a waiting list of 11,201.

Mr. Taylor indicated that more money than ever before was appropriated for the construction and maintenance of highways and, further, that larger grants have been provided to assist municipalities in the construction of municipal district roads as well as local improvement district roads.

The completion of the Alhambra Memorial Hospital scheduled for this year will provide a much needed service to those suffering from tuberculosis.

Hon. Dr. J. L. Robinson, Minister of Industries and Labor, gave a report explaining in detail the government's proposal to change the system of annual licensing for businesses, to one of permanent registration—a savings in license fees to businessmen and a saving of administrative work to the license fee.

The government has decided to issue a continuing license or registration in the case of most businesses. During the year each licensee, in the business affected, will be advised that his annual license is being changed to continuing license or permanent registration without further cost to the owner of the business. There is some misunderstanding, however, on the part of some licensees at the present time. Some, apparently, are of the opinion that the annual license fee for the 1951-52 license year is not required. This is incorrect. Dr. Robinson stated, and said he wanted to make it quite clear that the license fee is renewable for the 1951-52 fiscal year as previously. In the event that a business is not so informed the registration certificate or continuing license must be sent into the department, and the new agree-

Easter Message

It is significant that the two great festivals of the Christian Church should both commemorate the birth of Christ. Christians celebrate His coming to earth and Easter His rebirth after having been claimed by death.

Birth is a beginning and rebirth a beginning again. Easter signifies that man can be reborn. Not only does it offer hope of life after death, it also gives mankind hope that, spiritually, the people of the earth can throw off the shackles of the past and go forward into the future with new confidence that the human race need not perish.

Forces of destruction have predominated so far in this twentieth century. Man has been clever; he has invented countless gadgets to make life easier for those who can afford them; he has cut down space and brought nations of the earth closer together; he has probed into the secrets of the universe and has learned how to use the power of atoms for warfare.

But man has not yet achieved the fundamental precept that "unless he learns to live in peace with his fellows, all his clever gadgets and all his power will ultimately destroy him."

Man everywhere on earth has been told that he must live in peace. But he will be required to take out a new registration. Any business coming into operation will pay approximately double the present rate. In no case will the permanent registration be less than \$5. A provision in the wording of the continuing license or Easter would be a challenge to the Christians of the world. They, and they alone, can make it possible for humanity to survive. They must, through the example of their lives, show others how to live so that the forces of evil may in time, be vanquished forever.

Again this week many new bills were introduced by the government. Several of them money bills. These bills covered a wide range of subjects including amendments to the Hospitalization Act; the government's program for the hospitalization of residents of the provinces for \$1.00 a day; The School Borrowing Assistance Act; The Old Age Pensions Act, as well as a bill to establish a new corporation, the Department of Highways. These bills will be discussed fully when they come up for a second reading.

The first discussion on estimates came up in the house this week and the Department of Agriculture was the first to be considered.

Mr. Ure endeavored to point out that the Department of Agriculture is largely a service department and each year is adding to itself and enlarging its services to agriculture. Mr. Ure also pointed out that farmers share in the expenditure of all departments of government by municipal grants, education grants and the like. The district agricultural service will be extended throughout the province as trained personnel are available although the extension was not expected to be rapid.

In regard to the copy program, material has been ordered by the government to be used in the destruction of these predators and a new copy program is being considered and will be announced within the next ten days.

The policy of seed cleaning plants was inaugurated three years ago when grants not in excess of \$10,000 for any one plant were made available by the government with the cost being shared equally by the government, the municipal district and the farmer. The district agricultural service will be extended throughout the province as trained personnel are available although the extension was not expected to be rapid.

In discussing the construction of the St. Mary's dam, Mr. Ure pointed out that the Dominion government assumed the cost of construction of the main ditch and reservoirs up to the dredge reservoir, but that the total cost of distributing the water thereafter, namely, the secondary and lateral canals as well as flood levelling, was to be paid entirely by the province.

The legislature approved the estimates for the department of agriculture and water resources branch amounting to over \$5,500,000.

to be reborn—He has to change his attitudes, his thinking, his very nature.

Instead of suspicion of his neighbors, he must learn trust, instead of using spies and propaganda, he must learn to use friendship and tolerance. He must learn to get along with his fellow men whose ideas and way of life may be different from his own. So important is this that the very force of civilization may depend on it.

"The message of Easter—that force of good will always sooner or later triumph over the powers of darkness—gives hope to every human being on earth who can hear it. What a pity it is that so many millions of people have no knowledge of the message that Christ brought to earth.

What can we do about it? We can't make our own belief in Christianity more vital. Christianity in Canada has tended to forget that it is a living religion, teaching a way of life that few have ever dared to try. Christianity has become so enmeshed with doctrine and dogma that its fundamental truth has been hidden. What sort of a world would this be, if, even in one country, every person tried to follow the way of life taught by Christ? No one knows. It has never been done.

Rebirth of man to new safety and new consciousness of his relation to his fellow men must start in the community. From there it must spread to the nation and hence to other nations.

It is not an easy thing to attempt to live up to the teachings of Easter or Easter would be a challenge to the Christians of the world. They, and they alone, can make it possible for humanity to survive. They must, through the example of their lives, show others how to live so that the forces of evil may in time, be vanquished forever.

It is not an easy thing to attempt to live up to the teachings of Easter or Easter would be a challenge to the Christians of the world. They, and they alone, can make it possible for humanity to survive. They must, through the example of their lives, show others how to live so that the forces of evil may in time, be vanquished forever.

Legion Ladies Held Postponed Meeting Thursday

The postponed meeting of the Legion Women's Auxiliary was held Thursday evening in the Legion Hall with a good attendance.

The president, Mrs. H. Bogalis presided over the meeting. The secretary, Mrs. Oliver, being ill was unable to attend. Miss Vandell acted as secretary and recorded the minutes. Much business was dealt with and many thank you letters were read.

Two applications for membership in the W.A. were accepted, namely: Mrs. P. Gordon and Mrs. R. W. Towns.

It was decided that the branch would send two delegates to the convention at Lethbridge in June.

The meeting came to a quick close when a heavy wind and blizzard conditions developed and all the ladies were taken home in cars.

You are welcome.

Blizzard Was Record Braker

Early Thursday evening one of the wildest blizzards to hit the district in many years struck. It raged all night and all day Friday and until Saturday afternoon when it blew itself out. Friday the wind and drifting snow was so bad that it was impossible to go across the district and the town. No business was done in town. Most business houses did not open and there were no customers and no word to brave the storm unless he really had to.

Thursday evening a large frost

window in Casey's Gents Furnishings blew in. Getting help Mr. Casey boarded up the window at 3 o'clock the next morning the window went out again. Again he had to get help to board it up. It was fortunate that Mr. Casey and his family live in the rear of the store and heard the window cave in for he would likely have found his place of business full of snow the next day.

Almost every street in town was plugged with snow drifts eight feet and more high. Elsewhere in town there were drifts 10 to 12 feet high. Some residences had their doors and windows blocked to the top with snow drifts and had to telephone neighbors to come and dig them out. Others managed to crawl out of windows and then dig the snow away from the doors so that they could get to and out.

The snow drifted into attics and many a resident in town spent considerable time Saturday and Sunday carrying the snow out before it melted.

All trains were halted. Some were derailed and those that did arrive were many hours late. The railway men worked night and day trying to keep the track clear. They certainly had a miserable time in the cold wind.

Sunday a snow plow opened the road leading to the Trans-Canada highway. A road was opened at the same time from down town to Eventide Home. Monday the town had a blizzard opening up all the streets.

Protect your herds! One injection of BOVIGEN

Now you can get safe, dependable, low cost protection against Blackleg, Malignant Edema and Shipping Fever. And... instead of having to vaccinate separately for each disease... you can do the complete job with one injection of Bovigen... the "triple antigen" that gives three-way protection.

Don't wait... Vaccinate! If you wait until your animals show signs of Blackleg or Malignant Edema, you may be too late to do anything about it. Usually, animals infected with either of these diseases will die in 24 to 36 hours. So the thing to do is check disease before it starts. And... the way to do it is... vaccinate with Bovigen. Remember... Bovigen is a preventative. You get the full benefits... cut down losses when you use it before disease starts.

salut three diseases... the cost per dose is surprisingly low. Then, too, you have time in injecting... one operation instead of three. Simple and easy to administer... all you do is follow the instructions. They're in every package. Bovigen comes in three handy amp bottles... 10 or 25 doses per bottle. Get the size that suits your herd.

Bovigen is supplied by the VETERINARY DIVISION SHARP & DOHME (Canada) Ltd., Toronto 13, Ont.

Only Costs a Little to Safe When you consider the loss of one dose of Bovigen protects a

R.C.A.M.C.

ROYAL CANADIAN ARMY MEDICAL CORPS

The Royal Canadian Army Medical Corps needs men to help meet the great task that it faces now—the job of keeping the Canadian Army Active Force in fighting trim and tip-top physical condition. There is the responsibility of caring for the sick and injured, maintaining health, preventing disease.

There's a place for trained and untrained men in the Army Medical Corps. You will be trained in one of the following skills: X-ray or laboratory technician, operating room assistant, medical assistant, instrument repairman, or in one of many other specialist trades. You can acquire this specialized training and make a place for yourself in the Army Medical Corps now.

Are now Join the Royal Canadian Army Medical Corps today. To enlist you must—
1. Be a Canadian citizen or British subject. 2. Be single. 3. Be between 17 and 40 years of age. 4. Meet Army test requirements. 5. Volunteer for service anywhere.

REPORT RIGHT AWAY TO:
No. 10 Personnel Depot, Currie Barracks, CALGARY, ALTA.
Headquarters, Western Command, Kingsway Ave., EDMONTON, ALTA.

HERE AND THERE

Owing to the snow drifted across, and blizzard Saturday Gleichen Irishmen did not parade, in honor of St. Patrick.

At Wilson, the Calgary Power Co. trouble shooter, said there is trouble with the power during the blizzard. One transformer leading to a farm went out of commission, so he hopped on an airplane and flew to the scene and repaired the damage.

John Latch, age 77 years, died last Friday. He had been a resident of Gleichen for the past year. The funeral took place Monday afternoon at 2 o'clock with Major A. F. Fortin officiating. Interment was made in Sventide cemetery.

With all the snow we now have the district should have good crops this year.

Land and supply goes to an area wherever it goes about 30 miles wide. That is for 10 miles on each side of the main line. There will be other laterals in places.

The main line is to be a 30-inch line from Alberta to Toronto. From Toronto, the diameter of the pipe will be 24 inches. The plan is to supply 133 communities, with gas. There are 3,600,000 people in these communities. The estimated cost is \$350,000,000, which will be supplied by a banking firm, Lehman Bros. of New York.

The steel shortage may cause some delay but by the time parliament, the Alberta Conservative Board and the Board of Transport Commissioners have dealt with the application, it is hoped that steel will not be in such short supply.

The pipe line company will be largely a transporting company. They will sell the gas to the local utility companies who will continue to deliver it to the ultimate consumer. There will be a great demand for the natural gas as the heat value in one cubic foot of it is about twice that of a cubic foot of the coal gas.

In order to deal quickly with any blowout or other trouble, small planes will fly over the entire length of the line daily, there will be an extra joint of pipe over every five miles and welding machines at even shorter intervals.

The company is looking for a permit for 35 years. They estimate that in that period they will have liquidated their entire investment but they think the reserves in Alberta will take

care of a much longer period. The construction of the line would have the effect of re-distributing factories, as, where cheap fuel is available, industry follows. The promoters are convinced that they can supply the gas at a price below that of coal or oil. Other pipe lines are also applying for incorporation, but nothing definite has yet been decided.

MOTOR CAR LICENSE PLATE FEES REDUCED

Motor car license plate costs are being reduced in Alberta, effective from the new license year opens April 1. It has been estimated that the reduction will save motorists \$700,000 a year in license costs.

For many years the Alberta Motor Association has been urging provincial governments to reduce license plate costs, which were claimed to be the highest in Canada.

Under the new license plan announced in the legislature by Premier Manning, there will be reductions as much as \$15 a year. Fifty-six per cent of the cars coming under the new schedule will get a reduction of \$10 or more and 31 per cent will get their licenses \$5 less than before.

Cars with a wheel base not exceeding 110 inches will pay a fee of \$10. Those with a wheelbase over 110 inches and not more than 120 inches will be licensed at \$15. For those with a wheel base exceeding 120 inches, the license will cost \$20.

Reduction in license when a car is 10 year old now will apply only to cars made before 1941. There will be no further rebate on license turned in by Jan. 10. The 40 per cent and 75 per cent reduction in license after October and January 1, respectively, will be discontinued.

While it has reduced car licenses the provincial government has increased the gasoline tax from nine to 10 cents a gallon, to yield an additional \$1,000,000 a year. Also, it has taken off the one cent a gallon imposed on gasoline for farm or industrial purposes.

The seven wonders of the modern world are the airplane, radio, antisepsis, antitoxins, x-ray, radio and the telephone.

The term "good-bye" is a corruption of the Greek word "eu" which means "good" and "bai" which means "to say".

Buttons were first put on a man's coat sleeves by Frederick the Great, to keep his soldiers from wiping their noses on their sleeves.

Seed Treatment Important!
This year, with so much long-germinating, poor-quality seed on farms in Western Canada, the importance and value of seed treatment cannot be over-emphasized.

Treatment Recommendations:
The organic mercury dust or liquid seed treatments officially recommended for 1951 are: Ceresan M, Levonon, Agron C, Merganona C, and Panogen (Merganona C should be used where wireworm control is required). Anticaine will control Stinking Smut (Bunt) of wheat, but it will not control the surface-borne smut of oats and barley. Ceramylide is so long recommended for treating cereal seeds. Any one of the above recommended organic mercury seed disinfectants, when properly applied to thoroughly cleaned seed, will give effective control of the cereal smut diseases, except the loose smut of wheat and barley, and of the seedling blights and seed rots of wheat, oats, barley and flax. For best results, wheat and flax should be treated at least 24 hours and corn and barley at least one week before sowing. Follow carefully the directions and precautions given by the chemical manufacturers.

Treating Frosted Seed:
Seed that has been subjected to a treatment of severely frosted seed is likely to be killed or seriously injured. Treatment of such seed is not recommended. If, however, damp grain has been stored carefully and thoroughly dried and should be treated. Grain stored on damp, frosted, or other damaged seed.

For further information regarding treatment write to your local Dominion Laboratory of Plant Pathology (Winnipeg, Saskatoon, Edmonton), or to Line Elevator Farm Service, Winnipeg. Can your local Line Elevator Service be a handy practical "Seed Treatment Chart".

The Ottawa Letter

BY SENATOR F. W. GERSHAW

The government of Alberta will decide in September whether natural gas will be exported from the province or not. In the meantime, several pipe line companies are being organized. The Canadian Montana Pipe Line Company proposes to build a line 50 miles long from the Manxton field to the American border. The McCall Frontenac and the Union Oil Company of California have drilled about 47 wells in the district south of Medicine Hat and have proven the field around Pakowki Lake. The gas will be used by the Montana Power Company for domestic and commercial purposes.

The Trans-Canada Pipe Lines Ltd. is preparing to export gas in a big way. This project is to build a pipe line for gas from Pincher Creek as far east as Montreal and probably to Quebec city. The route will be along main line of the C.P.R. to Winnipeg. It will then cross the Great Shield to Fort William and from there on it may follow the C.N.R. It will enter many of the largest cities of Eastern
